

## Full Immersion

Full Immersion is our most intensive course designed for a one or two week duration. You will combine 40 One-to-One lessons in class with 15 hours out of class in the company of a teacher. *This course offers the most time spent with a teacher.*

### What can you expect on this course?

By means of an interview on the first day, the course is designed specifically for you. The out of classroom activities are included, and are arranged to suit your interests. For example, if you are interested in finance you may wish to visit Lloyds of London while studying English at EC London.

Every weekday you will have lunch with your teacher. You will also have 2 accompanied activities and one excursion each week to maximise your exposure to English and provide 'real-life' opportunities in which to practise and improve your English skills out of the classroom. These are all included in the price.

Throughout your English course your progress will be monitored and recorded. At the end of your course you will receive a linguistic profile detailing your strengths, weaknesses, what you have covered, how you have developed, what you now need to do to consolidate your learning and how to improve further after you have returned home.
